We have a high trading experience with cryptocurrencies since its explosion in 2017, and we are composed by a group of professionals with know-how in promoting innovative business.

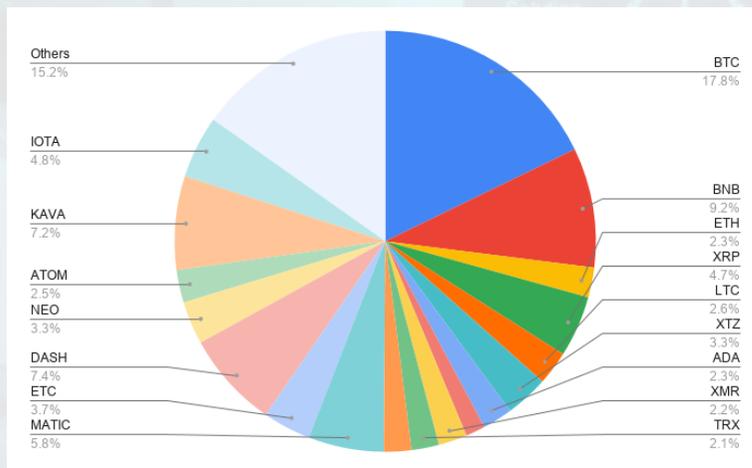

Our proposal is transparent and with real operations, and for that reason, we will remain in the market with consistency and longevity. We have high capacity for structuring and processing market information to make decisions.

## Investment Plans

You can choose an investment plan by configuring a portfolio on your Dashboard, in which you can choose the amount to be invested and the grace period.

You can create as many portfolios as you like, and you can monitor their performance in your private area.

We work with the best performing cryptocurrencies, as illustrated in the graph on the side.

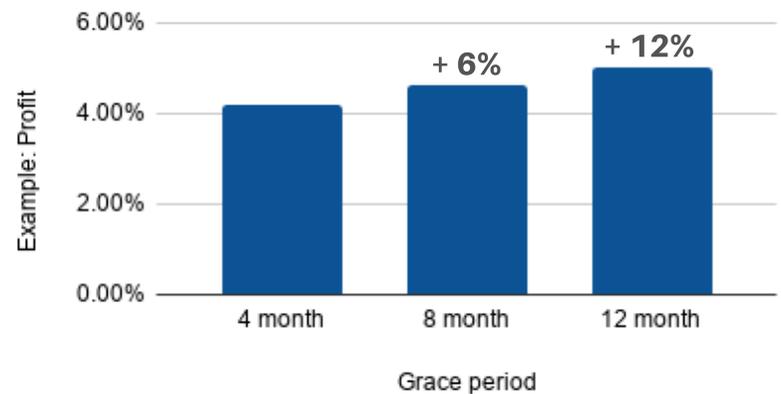

## Estimated Profitability

The standard investment has a 4-month grace period.

With each additional period, you will be rewarded with a 6% increase in profitability.

Example: Profit vs. Grace period

Your investment will be updated weekly on the Dashboard, and you will receive a detailed monthly performance report for the period.

**PROFIT:** In the last 12 months of exchanges, we earned an average of 4,185% profit per month on the amount invested.

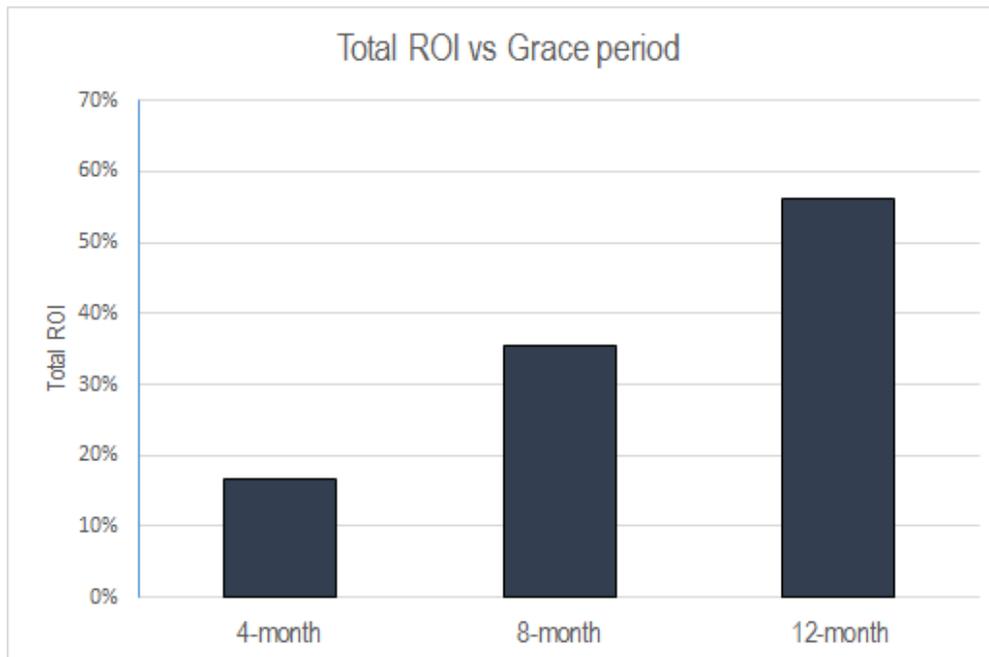

Profit (%) vs. Month

## Estimated ROI - Return on Investment

Considering our historical performance average, these are our estimates of Total ROI for each grace period chosen.

Estimated Total ROI:

4-month: 16.74%

8-month: 35.48%

12-month: 56.24%

**BONUS EXTRA:** In case of performance above the expected in the grace period, we will pay an extra bonus to your account.
